

# Gateway Medicard®

## Make Every Second Count

Time is of the essence - especially in an emergency when critical medical information is required.

Gateway Medicard® is designed to add to those crucial seconds by storing important personal medical data on a card the size of a regular credit card. Whether you, or a loved one are unable to relate this basic medical history, or if this type of information easily slips your mind.

Gateway Medicard® could truly be a life saver for you. Simply present your card to the health professional offering you care and feel secure knowing that you will receive the proper treatment immediately.

As a Member, you may order one free medical card per account each year.

It's important to update your card annually to ensure your data is current. You will receive a reminder and renewal form every 12 months.

To update your card more often, or to order cards for your spouse, children or other family members, costs just \$5 each. Similar cards cost \$8 to \$20 from other sources.
