

## Keeping you and your loved ones safer than ever

We live in a world with more crime being committed than ever before in history. At the same time, we have a broken 50-year-old 911 system that is slower and more inaccessible than ever before to provide help when we need it most. SAFE4R has created the answer to the question of "How can I keep my family safer than ever before?"

With over 25 powerful features, most of which are triggered automatically with a simple voice command, SAFE4R has created a new layer of protection for ourselves and the people we love and care about. With SAFE4R, we leverage a powerful connectivity engine to allow our loved ones, and most importantly people "nearby", to become aware of any medical or criminal crisis that we or our loved ones may be encountering so that they can become a more immediate access point to help. Awareness and the stability to act quickly is many times the most important element in survival of a crisis. SAFE4R's "Safety Net" and many of its other features help provide those attributes when you need them most. The additional features of 24/7 access to Mental Health Professionals and our incredible, robust Missing Persons and Abduction tool makes SAFE4R one of the most powerful safety applications around the world.

### *How to use it:*

We built SAFE4R to be very simple to use. By simply saying a private voice command that you set up, or by clicking a single button, you activate a powerful engine that triggers a multitude of safety features automatically.

By inviting family, friends, and neighbors to join you in the application, you increase the power and reach of your ability to be safer than ever before.

- Voice Activation or Single Button Push
- Automatically ignite 17 amazing features
  - 20 different languages
  - Screen black out
  - Auto notification to witnesses
  - Buddy video in video interaction
  - Live video streaming to witnesses
